CONTENTS

The Proceedings of the Seventh International Symposium on Inventories

Preface
A. Chikán (Budapest, Hungary) xv

Inventories in the National Economy
Why are UK manufacturing inventory–output ratios falling?
I.G. Black, M. Peters (Cranfield, UK) 1
Joint micro and macro effects on inventories in the transition economies
A. Chikán (Budapest, Hungary) 11
Classical and variance bounds tests of the production smoothing hypothesis
S.P. Dimelis (Athens, Greece), M.A. Ghali (Bellingham, WA, USA) 15
Logistics change during the transition period in the polish economy
D. Kisperska-Moron (Katowice, Poland) 23
A study of inventories in Finnish manufacturing industry
J. Leinonen (Oulu, Finland) 29
Researching inventories: Why haven't we learned more?
M.C. Lowell (Middletown, CT, USA) 33
UK stock relief legislation and the short run tax elasticity of inventory investment
A. Milne (Guildford, UK) 43
Whether and structural reforms induced instability in agriculture and buffer stocks in India
K.N. Prasad, A.A. Banouei, C.V. Achuthan and R.G. Parkar (Bombay, India) 53
The role of inventory investment as a leading indicator of the US business cycle
A. Stern (Long Beach, CA, USA), N. Halpern (New York, NY, USA) 65
On-farm storage structure inventory management: An economic appraisal of rhumbu
J.C. Umeh (Makurdi, Nigeria) 77

Inventory Management
A coordinated order-up-to inventory control policy for a single supplier and multiple buyers using electronic data interchange
A. Banerjee, S. Banerjee (Philadelphia, PA, USA) 85
Effects of errors and delays in inventory reporting on production system performance
M.C. Bonney (Nottingham, UK), K. Popplewell (Loughborough, UK), M. Matoug (Al Fateh, Lybia) 93
Trends in inventory management
M.C. Bonney (Nottingham, UK) 107
A study of bottlenecks in a MRP environment using simulation
M.D. Byrne, R.J. Jackson (Nottingham, UK) 115
On the availability of "relevant costs" information in operation management
M. Corbey (Tiburg, The Netherlands) 121
Changes in Hungarian manufacturing strategies
K. Demeter (Budapest, Hungary) 131
MIS investments for operations management: Relevant costs and revenues
P. Dirks (Tilburg, The Netherlands) 137
Concepts and applications of inventory management in Northern Greece
V. Manthou (Thessaloniki, Greece) 149
A computer-aided inventory control system in China
Y. Hong, X.C. Zhong (Shanghai, China) 153
Statistical inventory control in theory and practice
C.P. McLaughlin, G. Vastag, D.C. Whybark (Chapell Hill, NC, USA) 161
Procurement and vendor management in the global environment
S. Palaniswami (Mt. Pleasant, MI, USA), B.P. Lingaraj (Fort Wayne, IN, USA) 171
Some ideas regarding reserving supplier capacity and selecting replenishment quantities in a project context
E.A. Silver (Calgary, Alta., Canada), K. Jain (Bombay, India) 177
Analysis and integration of optimizing models for logistic systems
M.G. Speranza (Brescia, Italy), W. Ukovich (Trieste, Italy) 183

Mathematical Modelling of Inventories

Evaluation of forecast models used for inventory control during a product's life cycle: A simulation study
P. Alstrøm, P. Madsen (Aarhus, Denmark) 191
Approximating general multi-echelon inventory systems by Poisson models
S. Axsäter, R. Forsberg, W.-F. Zhang (Luleå, Sweden) 201
An application of the multi-stage Monte Carlo optimization algorithm to aggregate production planning
M.A. Bakir, M.D. Byrne (Nottingham, UK) 207
Coordinated vs. independent inventory replenishment policies for a vendor and multiple buyers
A. Banerjee, J.S. Burton (Philadelphia, PA, USA) 215
An economical resetting model in continuous review
D. Beyer, H.-J. Girlich (Leipzig, Germany) 223
Perturbations in living stock and similar biological inventory systems
L. Bogataj, J.A. Čibej (Ljubljana, Slovenia) 233
Optimal control of hereditary inventory systems with short-time conservation effects
M. Bogataj, (Ljubljana, Slovenia) 241
Reliability of some inventory-production systems
E.V. Bulinskaya (Moscow, Russia) 245
The role of master kits in assembly operations
J.G. Carlson (Los Angeles, CA, USA), A.C. Yao (Northridge, CA, USA), Wm.F. Girouard (Pomona, CA, USA) 253
A preliminary model for lost sizing in semiconductor manufacturing
T.F. Carmon (Berkeley, CA, USA), S. Nahmias (Santa Clara, CA, USA) 259
Sensitivity of quadratic cost functionals under stochastically perturbed controls in inventory systems with delays
J.A. Čibej, L. Bogataj (Ljubljana, Sovenia) 265
Multi-echelon inventory Theory – A restrospective
A.J. Clark (Cottage Grove, OR, USA) 271
Initial order quantities in multistage serial production systems
H. Ding (Linköping, Sweden) 277
Multi-item inventory systems with joint ordering and transportation decisions
M.J.G. van Eijs (Tilburg, The Netherlands) 285
Criticality analysis of spare parts using the analytic hierarchy process
P.P. Gajpal (Nainital, India), L.S. Ganesh, C. Rajendran (Madras, India) 293
Further theoretical considerations on the relationship between MRP, input-output analysis and multi-echelon inventory systems
R.W. Grubbström, A. Molinder (Linköping, Sweden) 299
Continuous review lost sales inventory models where two orders may be outstanding
R.M. Hill (Exeter, UK) 313
Safety stocks in multi-stage divergent inventory systems: A survey
K. Inderfurth (Beilefeld, Germany) 321
A decision making policy for capital investment concerning the size of a production unit
R. Kalfakakou (Thessaloniki, Greece) 331
Economic lot scheduling heuristic for random demands
P. Kelle, G. Clendenen, P. Dardeau (Baton Rouge, LA, USA) 337
On (s, S) – control in a manufacturing system
P. Köchel (Chemnitz, Germany) 343
Storage opportunity loss with a Pearson demand distribution
H. Pastijn, M. Schaffers (Brussels, Belgium) 351
Sequential stability of the constant cost dynamic lot size model
K. Richter (Frankfurt, Germany) 359
Inventory control with variation in lead times, especially when demand is intermittent
A. Segerstedt (Västerås, Sweden) 365
Supply centers allocation under budget restrictions minimizing the longest delivery time
C. Tsouros, M. Satratzemi (Thessaloniki, Greece) 373
An inventory management model for an inventory consisting of lumpy items, slow movers and fast movers
A. Vereecke, P. Verstraeten (Gent, Belgium) 379
On multi-stage production/inventory systems under stochastic demand
W.H.M. Zijm (Enschede, The Netherlands), G.-J. van Houtum (Eindhoven, The Neherlands) 391

A stochastic model for forecast consumption in master scheduling
P.J. Weeda (Enschede, The Netherlands) 401
